JLTRA

Audio productions tends to take place in either big, open environments where privacy is hard to find or in small spaces where causing noise nuisances or outside noise filtering into the room can be problematic.

If you are looking for a space to rehearse, record or mix music or vocals with sound insulation and acoustic quality, VicBooth Ultra brings it all together, in a room that can change size depending on your needs.

VicBooth Ultra can achieve noise reduction levels of 30 decibels* with only 1.1" thick walls.

* NOISE ISOLATION CLASS VALUE CALCULATED ACCORDING TO ASTM E413 AND MEASUREMENTS TAKEN ACCORDING TO ASTM E595. For the VicBooth Ultra standard version we created the internal acoustic conditions to suit most needs, with sound absorbing walls and ceiling. On top of that, we offer advanced options for more demanding professional audio environment application, with the various acoustic kits developed by Vicoustic's technicians.

This new booth was developed by Vicoustic, a leading company in the acoustic solutions industry, with years of experience developing acoustic products for the most demanding audio professionals.

Sound insulation

VicBooth Ultra can achieve noise reduction levels of 30 decibels* with only 1.1" thick walls.

Acoustic absorption

The standard version comes with internal acoustic conditions to suit most needs, with sound absorbing walls and ceiling. Vicoustic offers additional acoustic kits for variable acoustic situations.

Modularity and Expansion

The modular system of the cabin allows you to design your own booth and grow it into different sizes and update its features.

Unbeatable price

Made from recycled

recycled plastic bottles.

Walls and ceiling in high-performance VicPET Wool, mostly made from

materials

All this at an unbeatable price for a professional production booth.

Your needs, your design.

VicBooth Ultra was designed to be a modular (and easy to install) solution, offering the ability to fine tune your professional production environment to meet your different needs.

The modular system of the cabin allows you to design your booth as you wish in just a few steps.

VicFix

Recording Room

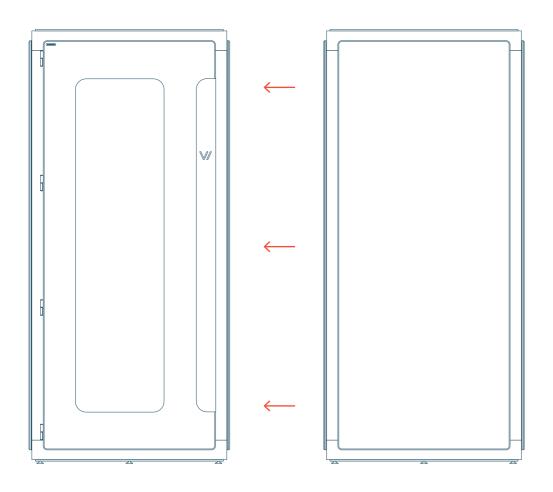

The modularity of this system allows you to configure your space exactly how you want it

You can have two booths, a control room and a recording room, side by side, with space in between.

This solution offers better sound insulation between the rooms than if they are both in a single unit.

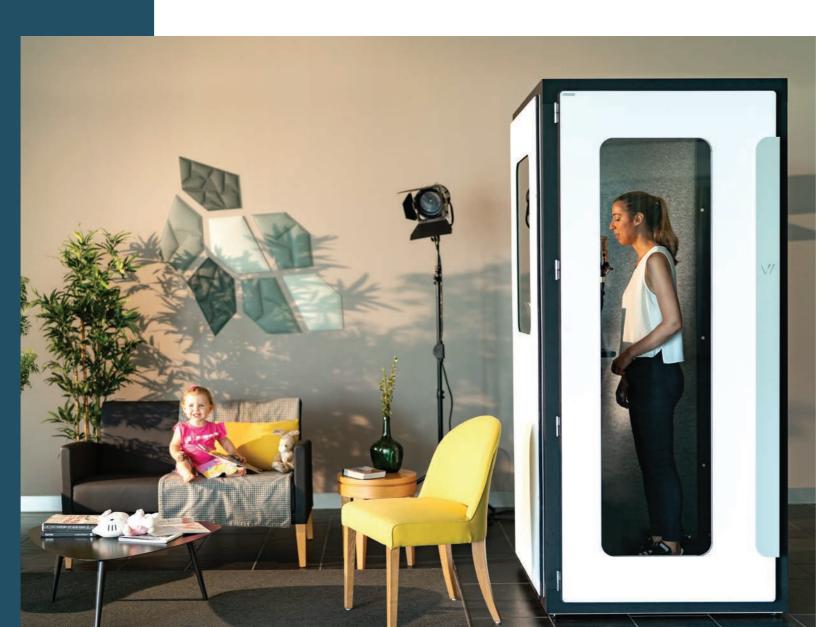

And, if in a while you realize you need more space?

Don't worry, you can add new modules at any time!

It's that easy!

19

Music

Vicoustic's new VicBooth
Ultra was specially developed
for professional production
environments, where performers
often need to find an isolated
space to produce their work.
The booth is perfect for
musicians and other audio
professionals who want great
acoustic results from a modular
sound insulation booth.

Voice recording

Voiceover and voice performance recordings will sound clearer inside a VicBooth Ultra.

Translation

The VicBooth Ultra will make simultaneous interpretation and translation clear and clean in this high-performance solution.

Education

For music education in which all music specialities need to work together, the VicBooth Ultra is easy to adjust to any needs. As for physics, acoustics and audio education, it will help students to perceive related theory (psychoacoustics, reverb time, sound image, first reflections).

Gamers

VicBooth Ultra will take you to the next level in isolation from the outside world. Immerse yourself completely in your game.

Alternative applications

You can adapt your booth to a variety of applications depending on your needs.

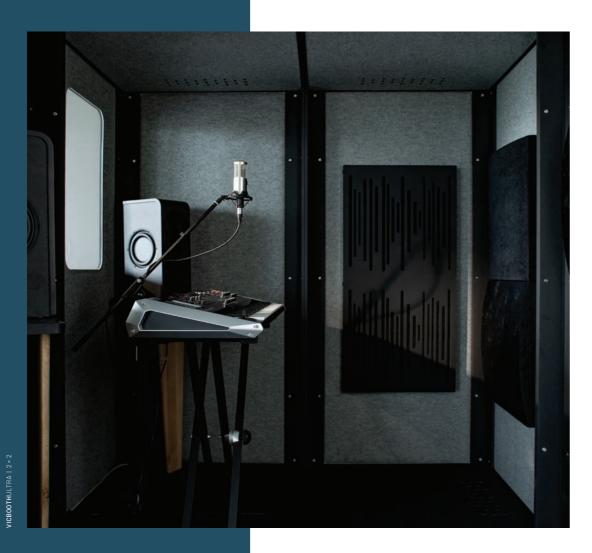

The VicBooth Ultra Standard version comes with sound absorbing walls and ceiling, in order to control specular reflections, flutter echoes and to avoid excessive reverberation within the booth.

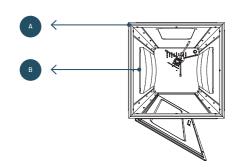

For some applications, you will want to fine tune the booth's internal acoustic conditions by including extra acoustic treatment packs.

Vocal Booth Kit

The human voice can have strong mid- to low-frequency components, so in order to control that, we recommend upgrading the absorption characteristics of the booth.

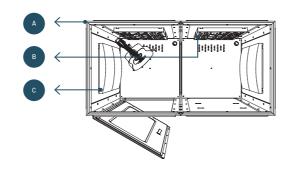

This kit contains

- ⚠ VicBooth Ultra 1×1
- B Cinema Round Premium (4)

WIGBOOTHULTRA I 1 × 2 I LAYOUT RECOMMENDED

Adding the VicPattern Ultra Wavewood to the VicBooth Ultra walls will give you the brightness of high frequencies normally valued by producers.

This kit contains

- A VicBooth Ultra 1×2
- B VicPatterns Ultra Wavewood (4)
- © Cinema Round Premium (4)

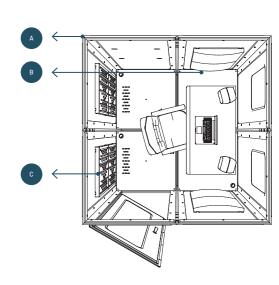

Control Room Kit

This kit will improve first reflections, stereo image definition, sound source localization and will minimize comb-filter effects.

This kit contains

- A VicBooth Ultra 2×2
- B Cinema Round Premium (4)
- © VicPatterns Ultra Wavewood (4)

Recording Room Kit

This kit improves mid and low frequencies of several instrument spectrums by using Cinema Round Premium panels. To compensate for any lack of high frequency components we recommend using VicPattern Ultra Wavewood panels, which will help you achieve a more pleasant and balanced environment.

This kit contains

- A VicBooth Ultra 2×2
- B Cinema Round Premium (4)
- O VicPatterns Ultra Wavewood (8)

The acoustic kits developed by Vicoustic use Cinema Round Premium and VicPattern Ultra Wavewood panels.

VicBooth Ultra's side with VicFix come ready with fittings for VicFix System accessories and can accommodate compatible Vicoustic acoustic treatment panels, ensuring that the booth's internal acoustics can be fine-tuned according to the type of professional production environment you need.

Cinema Round Premium

Cinema Round Premium panels provide a flexible and elegant solution for sound control across a multitude of applications.

Combining modern design with maximum acoustic efficiency, the fabric-covered Cinema Round Premium panel is commonly used to control sound reflections and excess reverberation, helping you maximize the performance of your listening space.

7

Cable Passage

Each single unit has a 70mm diameter channel in the floor to accommodate passing cables, even after the booth is assembled, making it easily adaptable for all of your sound situations.

Airflow Labyrinth

Ine Airflow Labyrinth was designed to ensure passive air circulation within the booth. There are air passages in the booth's floor and ceiling that circulate the air using body heat: users' body heat brings in new air from the outside through the floor and pushes out old air through the ceiling.

Mechanical Ventilation

If one needs, VicBooth Ultra can include a mechanical ventilation system that can be attached to the ceiling, ensuring total air renovation of a single unit in less than 2 minutes.

The system is designed to ensure a very low noise within the booth of NR21

sustainability

Our desire to respect our environment played a major role in how we developed the VicBooth Ultra. It is composed of high-quality melamine combined with MDF and coated with VicPET Wool, a non-woven textile with superb acoustic performance, predominantly made from recycled plastic bottles.

The use of this innovative acoustic material allows us to recycle the equivalent of 1044 standard plastic bottles (500 ml) for each 1×1 booth we produce.

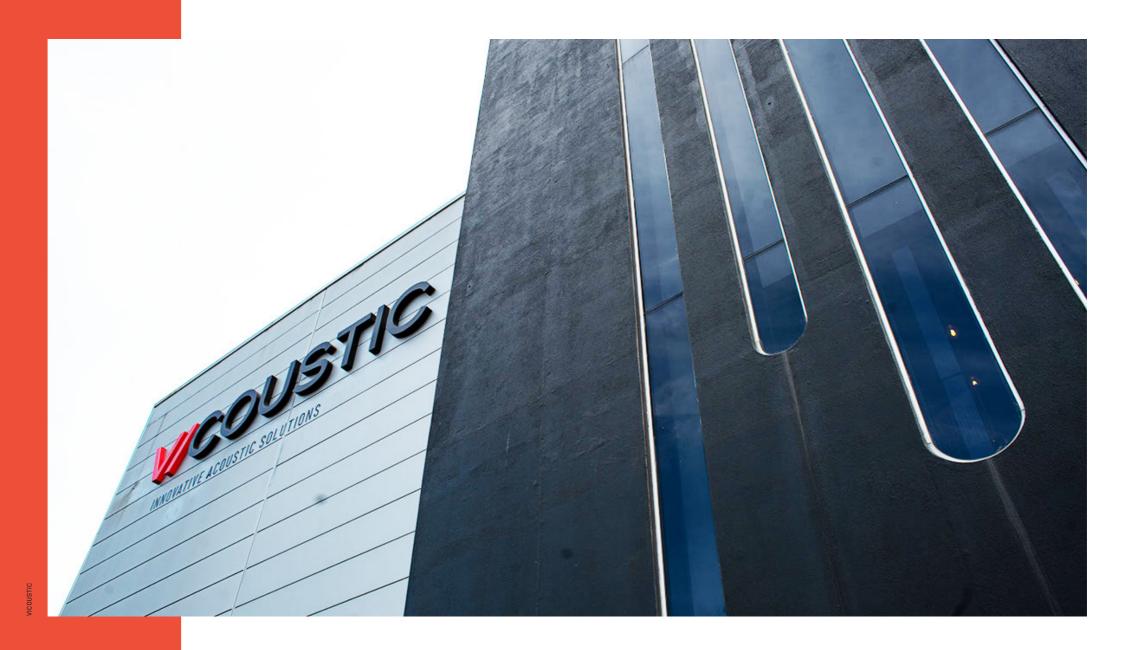

The quality of the raw materials not only helps preserve our planet's natural resources, but also allows for the VicBooth Ultra to be more durable and environmentally conscious whilst ensuring great acoustic performance.

In addition, the flat packaging for shipping was designed to produce the minimum waste possible, reducing the transportation carbon footprint.

We're recycling the equivalent of 1044 plastic bottles per 1×1 booth

Booth Size	Amount of Plastic bottles	1× = 100 Bottles
1×1	1044 Bottles	
	1784 Bottles	
1×2		
	2976 Bottles	
2×2		
2×3	4168 Bottles	

A leading force in the industry, founded in 2007, Vicoustic understands the unique sound dynamics of a room or venue

So whether it's a Home Cinema Hi-Fi to a professional sound system for radio and television, its expertise for peak acoustic performance is second-to-none.

Being at the forefront of acoustic technology, Vicoustic combines engineered systems with stunning design to bring you sound that is free of compromises, but full of high quality performance.

The products from Vicoustic deliver clever and innovative solutions to meet the demands of spaces that require a sophisticated soundscape. Taking on board the high standards of their customers, Vicoustic continuously strives to manufacture products of superior functionality, adaptability, but all the while with a sustainable and environmentally conscious mind-set.

Modular. Versatile. Perfect.
